U.S. Department of Agriculture

## Price List

In this list we are offering a selected group of most of the more popular Daffodils that we grow, together with a number of the finer recent novelties. This sheet will be sent to those whose names are on our regular mailing list and copies will be mailed to those requesting them.

## 1948 ILLUSTRATED CATALOGUE

Our complete catalogue listing many more varieties with longer and more complete descriptions, illustrations in color and halftone, data on culture, hybridization, classification; and other features designed to be of interest to fanciers should be ready about May 1st. This catalogue which costs us about 50c per copy to publish and distribute, will be sent to recent customers and to others who remit 25c, preferably in coin. We cannot send these out indiscriminately, as to do so would absorb all our profits or necessitate our passing on the cost in increased prices for bulbs. Obviously, when we send out eight or ten free catalogues for every resulting order, a sizable amount must be deducted from each order before we receive anything for the bulbs themselves. The small fee charged for catalogues helps to defray their cost and allows us to pass on some of the savings to our customers. If you have ordered in the last two years or have remitted 25c for the current edition, you should notify us if your copy does not reach you by June 1st.

## NOTE PRICE REDUCTIONS

Most varieties selling at more than 25c per bulb have been reduced in price this year; in many cases prices have been drastically lowered. In addition, we are giving premium bulbs as indicated in the next paragraph.

## TERMS: PLEASE READ

Please send cash with order or 25 per cent down and the balance on or before delivery. Prices prepaid on orders of \$2.50 or more. On smaller orders, please send 25c for postage and packing. For those willing to pay express, we will send bulbs express collect including extra bulbs of greater value than cost of transportation. With orders of \$10.00 or more accompanied by cash in full, we will include extra bulbs of our selection to the value \$3.00 or more; on orders of \$25.00, we will add \$8.00 in bulbs. **This offer good until August 1st** although we will still give extra bulbs to some extent after that date. These premium bulbs will be of some of the newer varieties; or, if you prefer, some of our selected seedlings either under consideration for future introduction or some already named. This latter offer good only as long as stocks permit. Unless you state on order, "I prefer selected seedlings as premium bulbs," we will use our own judgment. These premium bulb offers do not apply to orders for collections as these already include premium bulbs. All bulbs offered subject to prior sale and subject to crop or conditions beyond our control. We aim to send out only true-to-name healthy large bulbs that should bloom well the first spring after planting. Most bulbs will be double nose.

ZERO—Giant pure white early flower. Extra fine.....	20.00
ZOE—Cream perianth; orange yellow crown.....	1.00

### A BARGAIN FOR BEGINNERS

SEEDLINGS—We grow thousands of seedlings each year from crosses between varieties that appear to us to have promise of giving some improvements. Out of these a very few are selected for further trial when they bloom. The others, many of which are superior to the average older varieties of Daffodils, are sold in mixture. We do not promise that you will get anything outstanding from these but we have had some very fine reports from customers who buy them. If you are not interested in names but want some nice Daffodils, we consider this a very good buy. This will give a good range of size, color, blooming season, and type. Bulbs of large blooming size \$1.50 per dozen prepaid. \$8.00 per 100 EXPRESS COLLECT.

# Special Collections

## COLLECTION AA
